

## *Sucker Spawn*

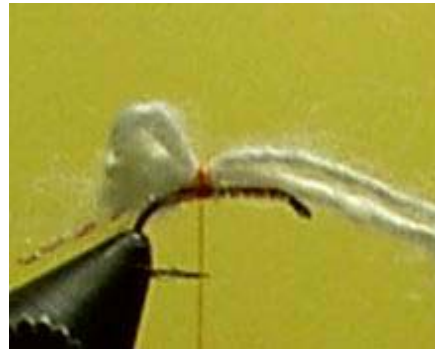

**Hook:** Daiichi 1530 sizes #8 - #14      **Tail:** Krystal Flash Optional

**Thread:** Danville Fluorescent Red 6/0

**Body:** Angora Yarn (cream, pink, chartreuse and orange)

**Step 1** Wrap hook shank with several layers of red fluorescent thread finishing at the bend. Take a 5-inch piece of angora yarn and fold in half. Proceed to tie in at bend making a tail.

**Step 2** Begin making successive pairs of loops (on top of shank) starting in front of the tail and working towards the eye of the hook. Make 5 pairs for a size 14 hook.

**Step 3** Initially make loops longer than normal and adjust to desired size by tightening up on both free ends of yarn simultaneously. (You will be able to make the loops to exact size as you tie more) After last loop pair is made, cut remaining yarn close to shank and build a thread head whip finish and cement.
